

Artwork handover

Original research · 6 figures · 3 tables · rebuilt to one journal's specification

This is a redacted sample. It shows the structure and level of detail of a real deliverable. Client names, journal names and identifying particulars have been removed or changed. Ask us and we will send one built around a manuscript like yours.

The audit, issued before any work began

Portal error messages rarely name the real fault. This is what the six figures actually failed on.

Check	Result	Detail
Resolution	2 of 6 pass	Four below the floor at reproduction width; two were screen captures at roughly 96 dpi.
Colour space	1 of 6 pass	Five supplied in RGB where this journal prints CMYK. One relied on a red–green contrast with no second cue.
Type size	3 of 6 pass	Three carried axis labels falling below 5 pt once scaled to a single column.
Line weight	4 of 6 pass	Two used hairlines that break up in print.
Labelling	4 of 6 pass	Two micrographs had no scale bar; one figure had no units on the y axis.
Patient identifiers	1 flagged	A clinical image retained the acquisition date and institution in its metadata.
After rebuild	6 of 6 pass	All six clear the journal's stated requirements and the portal check.

What was done to each figure

Figure	Work
F1	CONSORT flow diagram built from the participant numbers in the text, reconciled against the results section. Vector.
F2	Kaplan–Meier curves rebuilt from source data at 600 dpi line art, with a numbers-at-risk table added beneath.
F3	Forest plot converted to CMYK TIFF at 300 dpi; marker sizes made proportional to weight.
F4–F5	Multi-panel micrographs: scale bars added, panel letters set in one face and size, brightness corrected across the whole frame.
F6	Mechanism schematic redrawn from a hand sketch as editable vector art, with a colour-blind-safe palette that reads in greyscale.

Prepared, never manipulated. Every adjustment was applied to a whole panel. Nothing was removed, added, spliced or enhanced in part. Where a figure could not be saved without crossing that line, we said so and rebuilt it from your data instead.

Files delivered

- Six figures as TIFF and EPS, named for upload
- A single PDF of all figures at printed size, for circulating to co-authors
- Editable AI and SVG for every rebuilt figure — the artwork is yours
- Three tables formatted to the journal's layout rules
- Captions drafted or checked against each figure
- This audit, and a note of what was set against which instruction

Free reformats to the same journal for 60 days from delivery.
